Turbocharged 2.4L diesel engine runs smooth and efficient delivering 45 HP and 139 lb-ft of peak torque and meets Tier 4 interim emission standards.

Best in class visibility provides clear sight lines to the bucket or attachment, edge of tires, and out back, increasing confidence and productivity, even in close quarters.

Lightweight agility, whether you are tiptoeing around zero lot turns, moving dirt or laboring indoors, this 5200 pound machine won't be pushed around.

Optimal 60/40 weight gives you the stability to handle heavy loads. Rated operating capacity of 1500 pounds the 315 can deliver plenty of productive punch.

Low center of gravity combined with a generous ground clearance of 7.6", these skid steers are productively agile.

Dump angle of 40 degrees enables buckets to empty completely and a 30 degree of rollback keeps the load in the bucket so it arrives at its intended designation.

Best in class serviceability with features such as heavy-duty drive chains that never need adjustment, easy to fill large capacity fuel tank and ground level access to engine components, filters, starter and its maintenance free battery.

Comfort and convenience with its sculptured high back seat and an easy to read diagnostic monitor. Large backlit gauges and LED warning lights display vital operating information at a glance.
