The John Deere 4120PR is the ideal compact tractor for small farmers, golf courses, parks departments and other governmental agencies.

Features:

Powerful 43 HP 4 cylinder turbo charged diesel engine with 91 ft/lbs of torque (the stuff that gets work done). Strong enough to handle up to 21 rear or front attachments like a box blade, posthole digger, front end loader or disk harrow. Its 35.5 HP PTO rating and standard independent rear power take off give you what you need to handle a rotary cutter or rotary tiller.

Ideal for loading and mowing, the Power Reverser transmission, with dash mounted levers, makes it easy to shift from forward to reverse without clutching

Lift capacity (24" behind link arms) of 2500 lbs to handle your selected rear attachments.

Standard 4 wheel drive gives you the added traction for loader (up to 2728 lbs of lift capacity) or rotary cutter work.

Effortless power steering handles this 3700 pound tractor with ease.

Three year/2000 hour limited warranty gives you peace of mind. Easy service points and reliable components ensure your total cost of ownership of this tractor will remain low over its service life.

Optional quick hitch converts the 3-point hitch to fixed hooks and attaching points. All you need to do to attach most rear implements is backup and go.

Rugged and reliable Frontier rear blades, box blades and rotary tillers. Light work to heavy grading, manually adjustable rear blades provide greater control of blade angle and tilt position. Backfilling or leveling, the box blade rugged A frame is welded from heavy-duty plate steel and reinforced with structural supports to provide the durability tough jobs require.

Ease of use and maintenance, the Frontier disc harrow has front notched blades for cutting and mulching while the rear smooth blades slice and mix residue for a smooth finish.

Durability, backed with a 2 year limited warranty, the Frontier Rotary cutters feature a large gear box. A round blade pan plus a rugged slip clutch or half inch shear bolt protects your driveline and gearbox from sudden impacts.
