Powered by 39.9 HP Yanmar diesel engine, a quiet running, large displacement, direct injected Tier II emission certified, which delivers the torque to get the job done and has an impressive fuel efficiency.

Zero tail swing design allows these nimble excavators to rotate fully without banging into things. Independent swing boom and 360 degree rotation, they slip into close quarters comfortably.

This 10,428 pound operating weight machine is the big boy who digs the job. It also features a 8273 pound dig force with a 19' maximum digging reach and a 11'9.7" maximum digging depth. Swing speed of 9.3 rpm's and an 80 degree left and 60 degree right boom swing.

Undercarriage X-beams and track frames are sloped to shed material buildup for easier clean up. It can also be hydraulically retracted, enabling it to navigate narrow openings and into tight quarters.

Two trip meters to serve as service reminders, convenient lube charts, hydraulic sight gauge, spin on filters, a simple grease gun and wrench to quickly and properly maintain track tension, how easy is that.

Best in class spacious operator stations and refined cabs provide comfort and visibility. Large backlit gauges and LED warning lights display vital operating information at a glance. Switches and electrical connectors are sealed from moisture and dirt to help prevent corrosion.

Versatile compact, especially when add any of the many available buckets and Worksite Pro
