**While supplies last.

The John Deere 990 is the ideal economy tractor for turf, loader, utility and transport work.

Features:

Efficient 42 HP 4 cylinder Yammer diesel with 73 ft/lbs of torque. Strong enough to handle up to 20 rear or front attachments like a box blade, post hole digger, front end loader or disk harrow. Its 35 HP PTO rating and continuous live power take off gives you what you need to handle a rotary cutter, backhoe or rotary tiller.

Reliable gear transmission with 9 forward and 3 reverse speeds, plus a straight line shuttle for quickly shifting from forward to reverse—ideal for loader work.

Effortless power steering handles this 3175 pound tractor with ease.

Standard differential lock and the 4 wheel drive give you the added traction over challenging ground.

Three year/2000 hour limited warranty gives you peace of mind. Easy service points and reliable components ensure your total cost of ownership of this tractor will remain low over its service life.

Optional quick hitch converts the 3-point hitch to fixed hooks and attaching points. All you need to do to attach most rear implements is backup and go.

Rugged, reliable, ready Frontier rear blades, box blades and rotary tillers. Light work to heavy grading, manually adjustable rear blades provide greater control of blade angle and tilt position. Backfilling or leveling, the box blade rugged A frame is welded from heavy-duty plate steel and reinforced with structural supports to provide the durability tough jobs require.

Ease of use and maintenance, the Frontier disc harrow has front notched blades for cutting and mulching while the rear smooth blades slice and mix residue for a smooth finish.

Durability, backed with a 2 year limited warranty, the Frontier Rotary cutters feature a large gear box. A round blade pan plus a rugged slip clutch or half inch shear bolt protects your driveline and gearbox from sudden impacts.
