

# Rhino 75 Backhoe

**Rhino backhoes provide simple attachment, user friendly operation, and the top-notch performance you expect in agricultural, landscaping, commercial, or light-duty construction applications.**

Every Rhino backhoe is tested at the factory before shipping, to ensure quality. Three-point, subframe, or skid steer mount kits are available to fit a wide range of tractors and several skid steer loaders. Each backhoe features an easy access walk through operator platform and conveniently mounted hydraulic controls to help make operation as simple as possible. Swing cylinders feature "end of travel" cushioning for smoother operation and reduce sudden shock loads at the end of the cylinder stroke. All pivot points have grease zerks for easy routine maintenance and anti-rotation pins for longer wear life. Replaceable bushings are included at critical wear pivot points to help increase the life of the machine and to simplify repairs. Heavy wall "box-section" lift and dipper arm sections are reinforced at critical stress areas to handle hours of heavy use. Rhino heavy-duty buckets have replaceable hardened teeth and backside wear strips for maximum service life.

## Specifications

	75
Horsepower Range	25-45
Digging Depth	90 "
Reach From Center Line of Swing Pivot	120"
Loading Height	66"
Swing Arc (Degrees)	180
Transport Height ( Max.)	75 "
Transport Overhang	46"
Bucket Rotation (Degrees)	170
Stabilizer Spread (Down)	78"
Stabilizer Spread (Up)	50"
Bucket Digging Force	2675 lbs
Dipperstick Digging Force	2105 lbs
Operating Pressure	2000 PSI
Shipping Weight (approx)	855 lbs.
