Power

- 27-hp, 3-cylinder, large displacement, liquid-cooled TNV Series Yanmar diesel engine provides a high level of reserve power to handle tough jobs

Performance

- Standard power steering on 4-wheel drive models makes steering easier and quicker when maneuvering tractor and is especially valuable when mowing around obstacles and using a front loader; power steering is optional on 2-wheel drive models
- Individual pedals allow independent operation of right and left brakes; individual brake pedals help make shorter turns; the pedals can be locked together during transport for positive straight-line stops
- Standard differential lock can be engaged on-the-go for greater productivity; optional 4-wheel drive is available for extra traction and pulling power
- To deliver power to rear implements, the tractor features a continuous live 540-rpm rear power take-off (PTO); this rotating shaft provides power to implements such as rotary cutters, rotary tillers, and more
- Tractor features an open center hydraulic system; dual hydraulic gear pumps on models with power steering are driven off the engine crankshaft and provide high-capacity output for various hydraulic applications
- Equipped with gear transmission with 8 forward and 2 reverse speeds

Comfort/Convenience

- Operator's station is designed for easy entry to/exit from the tractor; left-side step and handrails assist you in getting on and off the tractor
- A high-backed seat offers good back support for comfortable operation; seat is adjustable both fore and aft; seat flips forward for protection from the elements
- Easy-to-read instrument panel includes tach/hourmeter, electric fuel gauge, oil pressure indicator light, alternator indicator light, coolant temperature gauge, and warning lights

Safety

- Seat belt and seat belt holders are standard
- Operator presence system (OPS) ensures the engine and transmission will shut down if you leave the seat when the tractor is in motion
- PTO presence system ensures the engine, transmission, and PTO will shut down if you leave the seat when the transmission, mid or rear PTO is engaged (unless you are using the stationary PTO switch)
- Standard two-post Roll-Gard ROPS roll-over protective structure protects you in the event of a tractor tip-over
